

LAND MONITORING RELEASE NOTES

Product Release - Land Monitoring

We're introducing 3 new streams of Land Monitoring Services!

This enables data to be delivered directly from the Land Mines Department to your device, giving you easy access to view, monitor, and audit your land assets, interests, and tenement data.

Spatial Viewing

- DataShed5 clients can now view dynamic tenements
- Customise your dashboard and start monitoring your tenure at the frequency of your choice
- Choose from various map styles for spatial viewing; magnetic, radiometric, border bouger gravity and more.

Land Monitoring Alerts

- Monitor your company's tenement outlines, areas of interest and watch competitor boundaries
- Continually track projects of interest
- Customised colour-coding for a tailored visual representation and live information access direct from your dashboard.

Auditing Reports

- Validate your critical data against relevant Mines Department records
- Receive Audit Reports direct to your desktop and cross-check your records
- Rapid identification of discrepancies that may save your most important assets.

Subscribe for updates on land monitoring technology as a standalone service for new clients and how it integrates with our premium suite of data management software for existing maxgeo clients.

To get Land Monitoring up and running all you need to do is contact your local maxgeo team or email sales@maxgeo.com.
