

User Training Course

About the course

The LogChief Lite training will be provided by the Database Administrator (DBA) or Product Manager and after watching the LogChief Lite User Onboarding Videos. The training session should be done on the client database.

At the completion of this course, participants will:

- Have an understanding of LogChief Lite operating systems.
- Understand how to download the application from browser
- Understand the use of the downloaded application for offline use
- Understand how to download collars and planned collars
- Learn how to use logging templates
- Learn how to use sample sheets
- Understand how to set up QC policy
- Understand the main menus and how to navigate settings

About our trainers
